

SAFE ZONES

OtoTrak allows you to create custom, safe-ride zones for your watercraft. Watercrafts inside safe-zone can use full speed, while watercrafts outside of the safe-zones will be automatically reduced to a minimum speed with a warning sound, even if the rider keeps the throttle fully engaged.

OtoTrak delivers full control over all watercrafts, and allows control of watercraft engines simultaneously if needed, or in case of emergency.

Example of rental safe-ride zones - Miami Beach

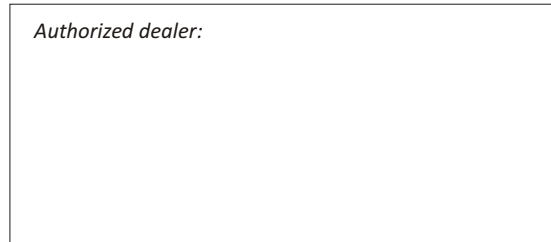

OtoTrak™ is a global technology company specializing in innovative and advanced automated systems for personal tracking, safety control, and management of personal watercrafts. OtoTrak's™ patented technology provides a complete turn-key solution for real-time tracking, supervision, and management. Track an unlimited number of personal watercrafts, from any location in the world with your smartphone or tablet.

OtoTrak™ is the world's first cloud-based remote control system for personal watercrafts (PWC).

Features include Intelligent Distance Control (IDC) to reduce the risk of collisions. The Rental Zone feature provides the customization of specific and multiple coastal safe-ride zones. Even yacht's and cruise ships operating globally can secure safe-ride zone parameters for guests.

OtoTrak's patented technology provides the latest state of the art management, supervision, and security solution for PWC rental businesses and private owners.

OtoTrak enables precise tracking of all watercraft operation, decreases employee or guest misuse, and tracks fuel consumption to maximize business potential.

Protect business and personal assets using OtoTrak Geofence feature, which allows for immediate location and recovery of any watercraft.

OTOTRAK FOR BETTER SAFETY

OtoTrak Intelligent Distance Control (IDC) feature greatly improves the safety of your watercrafts, reduces risk of watercraft collisions, and minimizes the chances of near-shore accidents.

OtoTrak Rental Zone feature allows for customization of safe-ride zones.

OTOTRAK FOR BETTER BUSINESS

OtoTrak can immediately locate and track watercraft from multiple locations on your smartphone or tablet.

OtoTrak keeps precise track (hours/minutes/seconds) of your watercraft's running time and fuel economy. The data is updated in real-time which enables you to efficiently track your employees performance, and maximize your business potential.

OTOTRAK COMPATIBILITY

The OtoTrak system is compatible with any post-2009, Sea-Doo or Yamaha personal watercraft.

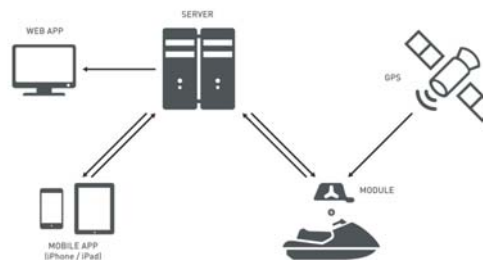

OTOTRAK PRESENTATION

OtoTrak app for iPhone / iPad + OtoTrak Remote

OtoTrak collects the watercraft data (GPS location, throttle, speed, and fuel running time), and transmits it to the server using FSM/GPRS technology. The collected data is then automatically updated and organized to the OtoTrak Cloud service. Users can monitor and control any number of watercrafts in real-time using OtoTrak mobile iOS or Android app on smartphone or tablet devices.

Geofence feature provide GPS anti-theft solution that alerts the owner if any watercraft moves out of any geofence zone, and allows tracking for recovery.

THE CHALLENGE

- Watercraft rental zone safety
- Keeping all active watercrafts safe
- Controlling watercraft's speed
- Minimizing watercraft collision
- Tracking watercraft's rent time
- Tracking watercraft's fuel consumption

THE SOLUTION

- Controls watercraft's position
- Tracks unlimited number of watercrafts
- Customizable speed limit
- Customizable safe-ride zones
- IDC collision detection and warning
- GPS precise rental time stopwatch
- Real-time fuel consumption
- GPS anti-theft warning and tracking

THE RESULT

- OtoTrak's patented technology based supervision for premium security
- Intelligent Distance Control for optimal rider safety
- Track's unlimited watercrafts in real-time via Google map
- Daily statistical analysis for maximized profitability
- Measurable business performance
- Protection of business and personal assets
